Introduction: Nexus with the Region of Madrid

All registrations in the .madrid TLD, regardless of their moment of registration, are restricted to bona-fide members of the community of the Region of Madrid (Comunidad de Madrid). This community is composed of those public administrations, organizations, legal entities and individuals linked to the Region of Madrid, or by any other kind of direct or indirect presence that is generally accepted as legitimate for, and conducive to the welfare of, the Region of Madrid.

Registrant's use of the registered domain name must be:

- (i) generally accepted as legitimate; and
- (ii) beneficial to the welfare, cause and the values of the Region of Madrid; and

- (iii) commensurate with the role and importance of the registered domain name; and
- (iv) based on good faith at the time of registration and thereafter.

Pre-launch Phase: Pioneer Name Program

During the pre-launch phase, the Comunidad de Madrid (“**Registry Operator**”) intends to conduct a Pioneer Program (subject to ICANN’s approval) for the purpose of promoting the .madrid TLD. Registry Operator intends to select and allow registration of a maximum of ninety-five (95) domain names under this program (“**Pioneer Names**”). Such Pioneer Names will be selected by the Registry Operator from among the eligible expressions of interests received, based on a criteria of visibility, notoriety and commitment to the promotion of the .madrid TLD.
