RE: Application for .Brand TLD Designation

Shell Information Technology Inc ("Registry Operator"), in connection with the execution of the Registry Agreement for the .SHELL TLD (the "Registry Agreement"), hereby applies for .SHELL TLD to be qualified by ICANN as a .Brand TLD.

Registry Operator confirms and represents to ICANN that the TLD meets each of the criteria for the TLD to be qualified as a .Brand TLD, as described in the .Brand TLD Application Process and Specification 13 attached thereto, and that all supplemental material accompanying this application is accurate and not misleading in any respect. Registry Operator also represents that the trademark registration attached hereto as Exhibit A, the registration policies attached hereto as Exhibit B, and the SMD file ID number attached here to as Exhibit C, are complete and accurate copies of the official trademark registration, Registry Operator's registration policies for the TLD, and the SMD file ID for the TLD for which this application is submitted respectively.

Registry Operator agrees that if Registry Operator makes any changes to its registration policies for the TLD (whether before or after this application has been approved) that may disqualify the TLD as a .Brand TLD, it will promptly provide ICANN with a complete and accurate copy of the revised registration policies. In addition, if Registry Operator fails to maintain the trademark registration underlying its .Brand TLD application, it shall promptly notify ICANN of such failure. Registry Operator also agrees to maintain the criteria required to qualify as a .Brand TLD and to immediately notify ICANN of any changes in circumstances that could alter the statements made, and supporting materials provide with, this application.

Registry Operator acknowledges and agrees that this letter is binding on Registry Operator and, if any of the foregoing representations and agreements becomes untrue or not complied with, it shall be deemed a breach of the Registry Agreement by Registry Operator, and ICANN may assert its rights under the Registry Agreement, including by determining that the TLD no longer qualifies as a .Brand TLD pursuant to the terms of Specification 13. **.SHELL Domain Name Registration Policy**

This .SHELL Domain Name Registration Policy (.SHELL Domain Policy) sets out the terms and conditions governing the registration and use of domain names in the .SHELL Top Level Domain.

The .SHELL Domain Policy may be updated periodically. The current version can be found at [nic.shell/policy](http://nic.shell/policy), and continued registration or use of a .SHELL domain name after any update constitutes acceptance of the current version. The only remedy in case of any disagreement with the current terms of the .SHELL Domain Policy is to cancel your domain name registration. The terms of the .SHELL Domain Policy as described below constitute the entire agreement concerning the registration of a .SHELL domain name; no other agreements or representations supplement or alter the terms of the .SHELL Domain Policy, except as expressly incorporated herein.

## General/Definitions

**Affiliates** means a person or entity as defined in paragraph 2.9(c) of the ICANN Registry Agreement *applicable to the .SHELL Top Level Domain available at [www.icann.org/en/about/agreements/registries/shell..](http://www.icann.org/en/about/agreements/registries/shell..)*

**Abuse Point of Contact** means the .SHELL Top Level Domain's abuse response team, which can be contacted at [REDACTED]

**Identical Match** means that the domain name consists of the complete and Identical textual elements of a Clearinghouse-validated trademark. In this regard: (a) spaces contained within a mark that are either replaced by hyphens (and vice versa) or omitted; (b) only certain special characters contained within a trademark are spelled out with appropriate words describing it ("@" and "&"); (c) punctuation or special characters contained within a mark that are unable to be used in a second-level domain name may either be (i) omitted or (ii) replaced by a hyphen and still be considered Identical matches; and (d) no plural or "marks contained" (e.g., "brandx" in "brandxproducts") qualify for inclusion.

**Trademark Claims** means notice to a prospective domain name registrant of the scope of the mark holder's rights whereby the prospective registrant warrants that: (i) they have received notification that the mark(s) is included in the Clearinghouse; (ii) they have received and understood the notice; and (iii) to the best of their knowledge, the registration and use of the requested domain name will not infringe on the rights that are the subject of the notice. If the domain name is registered subsequent to the notice being issued and the registrant attesting to its non-infringement, the Registrar or the Clearinghouse will notify the mark holders(s) of the registration.

**Trademark Clearinghouse** means a central storage repository of validated (authenticated) trademark rights-related data and information for dissemination with respect to trademark rights protection mechanisms and other registry-related services.

In the event a rapid takedown process is initiated, after assessment by Shell, the Registrar may be contacted for its cooperation in taking the subject domain name down (by locking or suspending the domain name, or placing it on hold or deleting it), unless a compelling argument is provided by the Registrar to Shell on which basis the subject domain name may remain in the zone. Shell or its delegate may remove orphan glue records (see [www.icann.org/en/committees/security/sac048.pdf](http://www.icann.org/en/committees/security/sac048.pdf)) when provided with written evidence that such records are present in connection with malicious conduct.
