On 04 May 2016, ICANN notified SuperSport International Holdings Proprietary Limited of its intent to terminate the .supersport Registry Agreement entered into on 05 March 2015 (Registry Agreement). Pursuant to section 4.3(b) of the Registry Agreement, ICANN may, upon notice to Registry Operator, terminate this Agreement if Registry Operator fails to complete all testing and procedures for delegation of the TLD into the root zone within twelve (12) months of the Effective Date.

Pursuant to the terms of section 4.5 of the Registry Agreement, ICANN consulted with Registry Operator to assess whether to transition operation of the .supersport top-level domain (TLD) to a successor Registry Operator.

On 04 May 2016, ICANN made a preliminary determination that operation of the .supersport TLD need not be transitioned to a successor Registry Operator based on the following rationale:

- Registry Operator has represented to ICANN that it holds intellectual property rights for the name "supersport".
- .supersport qualifies as a .Brand TLD per Specification 13 of the Registry Agreement.
- The .supersport TLD has not been delegated into the Root Zone, and there are zero (0) domain names registered in the TLD.

On 4 June 2016, after a 30-day period for comments by interested parties, no comments were received. Pursuant to section 4.3(b) of the Registry Agreement, ICANN has made a final determination to terminate the .supersport Registry Agreement by 30 July 2016.

In conformance with section 4.5 of the Registry Agreement (as modified by section 6 of Specification 13 for this .Brand TLD), ICANN may not delegate the TLD to a successor registry operator for a period of two years without Registry Operator’s consent, which shall not be unreasonably withheld, conditioned or delayed.
