

CSC Findings of IANA Naming Function Performance Report for the Month of September 2024

Date: 23 October 2024

Overall finding

The CSC completed review of the September 2024 IANA Naming Function Performance Report and finds that PTI's performance for the month was:

Satisfactory – PTI's performance over September 2024 was 98.4% for defined metrics. This was due to the missing SLA of:

Technical check (Retest) – Routine (Technical): A temporary technical issue prevented some completed tests being communicated to the Root Zone Management System, they were successfully completed when re-run automatically 15 minutes later.

Metrics that the CSC is tracking closely

Currently, there are no metrics requiring close tracking.

SLA metrics that are in the process of being changed

Currently, there are no SLAs in the process of being changed.

Report of escalations

No new escalations were received during the reporting period.
