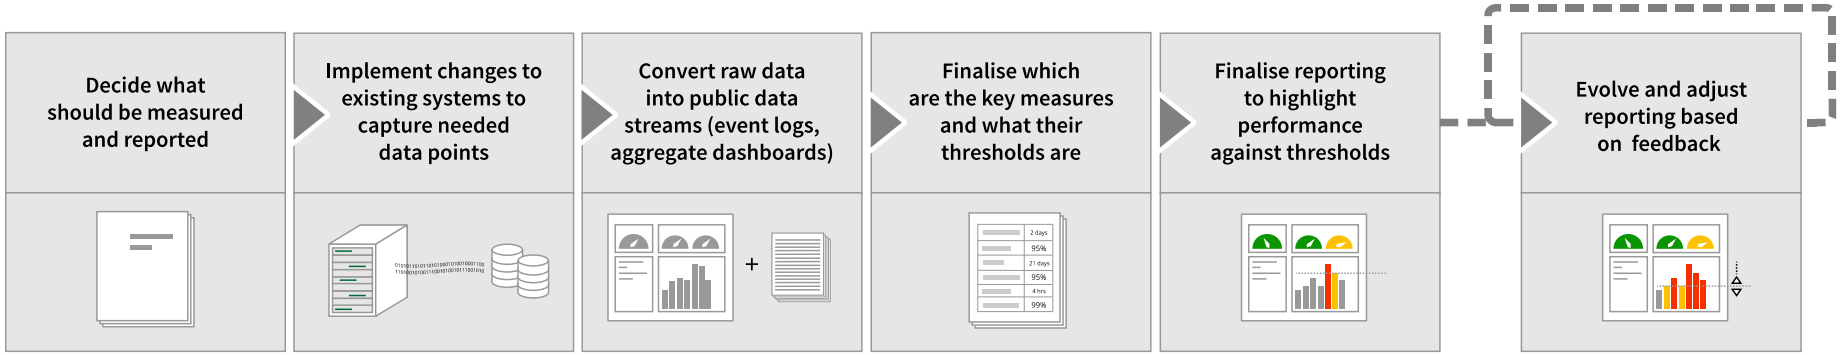
SLE Development & Implementation

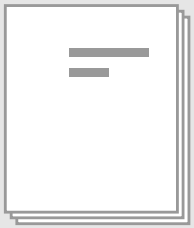
ICANN 55, 9 March 2016

SLE Development and Implementation

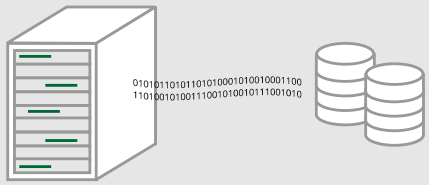


SLE Development and Implementation

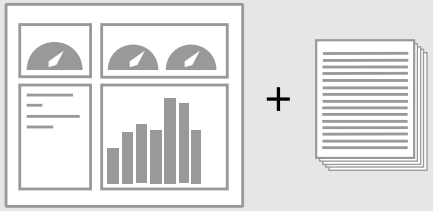
Decide what should be measured and reported



Implement changes to existing systems to capture needed data points



Convert raw data into public data streams (event logs, aggregate dashboards)



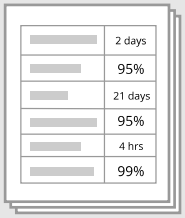
Design Team A CWG Final Report

RZMS deployment on 2 March

Tools development commences next week

SLE Development and Implementation

Finalise which are the key measures and what their thresholds are



After a period of data collection when trends emerge

Finalise reporting to highlight performance against thresholds

After ICANN and community agree on thresholds

Evolve and adjust reporting based on feedback

Regular engagement with CSC and periodic reviews
